

# Engineering of Ancient Greece

Name: Alan Mather

STEP Project Category: Study Abroad

STEP Faculty Member: Dr. Mary Pohlschneider

Major: Civil Engineering

## Project Description

During this study abroad trip in May, I explored many sites across Greece with historical, religious, and engineering significance, learning how and why they were created. During this trip, I also learned more about Greek language, culture, and food.

## Motivation to Study Abroad

- Desire to explore outside of the U.S.
- Combination of my major and passion for history

## The Course

- Pre-trip presentations
- Morning touring, evening exploring
  - Student tour guides
- Reflection journals

## What was Transformational about the Project?

- Global perspective on engineering, history, and other topics
- Brought me outside of my comfort zone
- Experiencing a new culture and language

## Favorite Parts of the Program

- The Acropolis
- Thessaloniki Subway Tour
- Eupalinos Tunnel
